Figma, Canva, wireframing, prototyping, UI design, UX fundamentals, visual design
Web & Programming
Python/Flask fundamentals, SQL, basic database concepts, basic JavaScript, basic HTML, CSS
Productivity & Data
Microsoft Excel, Word, PowerPoint, Google Workspace, data organization and analysis
Professional/Core Skills
Creativity, attention to detail, critical thinking, adaptability, teamwork, communication, time management

Academic & Portfolio Projects

CIT Computer Laboratory Inventory System — UI/UX Designer / Project Team
Designed a Figma-based admin dashboard prototype for monitoring computer laboratories, device inventory, room status, maintenance requests, and role-based access for Student Assistant, Professor, and Technician users. Applied interface hierarchy, consistent components, navigation, spacing, and interactive prototype flows.
Smart Agriculture — UI/UX Designer / QA Tester
Contributed to a Flask-based web application for soil analysis and crop recommendation. Supported interface design and quality assurance for soil-data input, fertility scoring, crop recommendations, records history, and administrative views. The system used SQLite for storage, pandas for data preparation, and a KNN model for crop recommendation.
